YOU'VE WORKED HARD FOR THIS AND IT'S FINALLY WITHIN REACH. YOU'VE CLIPPED PICTURES, RESEARCHED THE LOCATION AND VISITED MANY OPEN HOUSES. YOU'RE READY TO BUILD YOUR DREAM HOME, ONE OF THE GREATEST, MOST SATISFYING INVESTMENTS OF A LIFETIME.

Your future depends on this decision, but how do you begin? "You need a partner when you build your dream home, not just a builder. Dyerbilt provided that partnership for us" says Randall Bryant.

Who is Dyerbilt? Like so many others, Terry Dyer came to Durango Colorado for a slower pace, to ease into retirement. After raising his family in southern California and running a successful construction business with his brother, he happened upon Durango. Using the wealth of experience he gained throughout 20 years of commercial construction he began to channel his creative side into building custom homes. His son, Troy, followed him to Colorado and together they established Dyerbilt Construction with the absolute commitment to customer service and satisfaction. After 15 years, they have grown the Dyerbilt team to include a hand picked support staff of project managers, site supervisors, office staff and a small cache of carpenter craftsmen. They have developed close relationships with the area's best architects, engineers, local craftsmen and subcontractors. The commercial experience they gained in California translates well into Colorado's custom home market where 5,000 to 12,000 square foot homes have many of the fundamental, large scale challenges as their commercial counterparts. Smaller homes from 2,000 to 4,000 square feet may hide some pitfalls of hiring an 'average' builder,

but Dyerbilt's combination of cost cutting capacity, creativity and craftsmanship are just as well suited for homes of this size. Only in-depth knowledge, experience and behind the scenes logistical management can truly make your dreams a reality.

Dyerbilt has made it their commitment to provide you with the confidence that your home will be done on time, on budget and built well—you deserve it. "I cannot express how impressed we are with the 'team'. Everyone pitched in to make helpful and creative suggestions, and also went a long way to explain the pros and cons of every selection we were facing. All of you made our decisions easy, and when you felt it appropriate to cause us to pause and think hard, you did so. You spoke frankly and honestly. For all of this I say thank you, and I'm even more convinced we made the right selection for a builder. In fact, we are much farther along than I ever thought we would be at this time," said Malcolm Curtis who is currently building his dream home with Dyerbilt Construction.

Dyerbilt's unwavering commitment to quality has other added benefits as well. Their standard systems and construction methods are all recognized for their "green" qualities. Dyerbilt is dual certified, by both Built Green Colorado and the National Association of Home Builders, and utilize third party verification to certify the homes they build. Your home or commercial space can be custom tailored to suit your desired level of certification or participation. Their commitment to

green education and design criteria is a never ending process that grows as customer demands, public awareness and technologies change.

"We chose Dyerbilt because of their exceptional quality and craftsmanship, attention to detail and professionalism. Our experience of building for the first time was enjoyable and worry-free, and Dyerbilt exceeded our expectations at every stage of the project. We wouldn't have anyone but Dyerbilt build a home for us. Thanks! We love our home" says Janelle Meyer. Another successful partnership.
